

MARINE ACCESSORIES

We ran an article on Malaysian-made AirBerths in last April's Boat Asia issue, and regional dealers now have begun stocking this interesting product.

Latest brochures have been sent to *Asia-Pacific Boating* by KC Cheung's Faithful Marine at Aberdeen in Hong Kong — AML 28 Shum Wan Rd, tel (852) 2554 1541, fax 2873 1893.

Promoted by Australian-based Malaysian Andy Chan, the AirBerth is seen as a year 2000 successor to all those systems for keeping a boat out of the water tried in the last 30 years of the 1900s.

“You wouldn't park a Ferrari in the street so why would you leave your boat in the water?” he asks.

“AirBerth is a revolutionary way to keep your boat out of the water without the hassles of towing, launching, mooring and cleaning.

“It simply attaches to your current pontoon or marina berth, giving you instant access to your boat anytime”.

Not only is AirBerth easy to operate but it is durable. Unlike similar metal boat lifts which will deteriorate in the marine environment, the materials used — high density polyethelene — in the manufacture of AirBerths are designed for 50 years life.

The plastic is corrosion resistant to salt water, and non-abrasive to fiber-

glass boat hulls. AirBerths are subject to international patent application.

Contact Faithful Marine in Hong Kong — numbers above — or Andy

Chan, PO Box 1589 Broadbeach, Gold Coast 4218, Australia. Tel (61 7) 5531 7088, fax 5538 2980, email info@airberth.com, web the same.
