

SPEND MORE TIME ON THE WATER AND LESS TIME THINKING ABOUT IT!

The AirBerth® Boat Lift is a revolutionary system which stores your boat on the water over the water, allowing you to be out boating within minutes. This means more time on the water boating and less time thinking about it.

Berthing your boat couldn't be easier, with AirBerth's mooring guides helping you centre your boat as you drive back after going out boating. To raise your boat on the AirBerth® simply connect a small blower box to the AirBerth and turn the blower box on. Within minutes your boat will be up out of the water and protected from marine growth and electrolysis.

Working on the principal of air and water displacement, the AirBerth® uses two primary flotation tubes to lift your boat high and dry when it is not being used, ensuring that your hull is kept clean of foul or marine growth and your stern legs or outboards are not in your water suffering from Electrolysis, the AirBerth itself does not require maintenance as marine growth can grow on the unit without affecting its performance.

Already boasting a number of units in the waters of Port Lincoln, this Australian designed unit is making its mark around the world with sales in the USA, Canada, South Africa, South-East Asia and the United Kingdom.

AirBerth will lift boats from a Whitley 600 Monterey right up to a Riviera M430 Sport Cruiser. That's up to 10 tonnes of boat!

"Our on-going feedback from our customers is that they are getting out on the water a lot more and using the boat with their friends and family," commented Justin Lye the marketing manager of AirBerth Boat Lifts, "this is evident from our customers here in Port Lincoln, who during daylight savings get home after work, get some food, drinks and friends together, launch the AirBerth from the convenience of their back door and are out at the islands with hours of daylight to spare."

Justin has just been Port Lincoln demonstrating the AirBerth for locals in a lead up to the Adelaide Boat Show, if you would like more information on the AirBerth call Justin on 0422 875 561 or the AirBerth® team on (07) 5570-3611. Otherwise, if you are heading across to the Adelaide Boat Show you can visit AirBerth® at stand no 41.

Australia's number one choice... AirBerth Boat Lifts

The revolutionary new way to keep your boat out of the water, so that you can enjoy a trouble free boating lifestyle.

- ▶ Does not require anti-fouling.
- ▶ Corrosion free & easy cleaning spray jets.
- ▶ Fits into most dock configurations.
- ▶ Flexible cradle shapes to mono planing hulls.
- ▶ Suits boat lengths 4.6 to 14.3 metres.
- ▶ Easy one person launching and docking.
- ▶ High density polyethylene construction.
